L7 1 S (511274-07-0# OR 511274-09-2# OR 511274-05-8)/RN

The chemical structure shows a central carbonyl group (C=O) bonded to a propyl chain on the left and a 2-methyl-2-propoxy group on the right. The propyl chain consists of a CH₂ group adjacent to the carbonyl, followed by a CH group, and a terminal CH₃ group. The 2-methyl-2-propoxy group consists of an oxygen atom bonded to a quaternary carbon, which is also bonded to two methyl groups and a propyl chain. The entire molecule is drawn in a skeletal structure format with explicit oxygen atoms and a methyl group label.

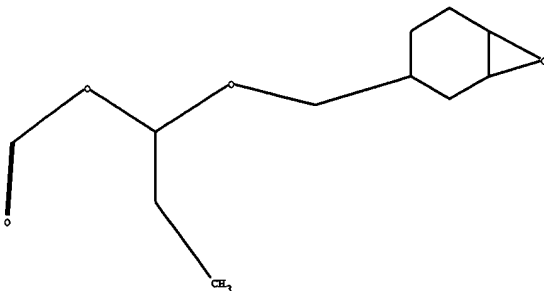

The chemical structure is 1-(2-methyl-4-oxopentyl)-2-oxobicyclo[3.1.0]hexane. It features a bicyclic system consisting of a six-membered ring fused to a three-membered ring, with a ketone group (=O) at the 2-position of the six-membered ring. Attached to the 1-position of the six-membered ring is a 2-methyl-4-oxopentyl side chain. This side chain consists of a five-carbon chain with a ketone group (=O) at the 4-position and a methyl group (CH₃) at the 2-position. The structure is drawn in a skeletal format with explicit labels for the oxygen atoms and the terminal methyl group.

The chemical structure shows a cyclohexane ring connected via an oxygen atom to a 2-oxo-2-methylbutyl group. The cyclohexane ring is on the right, and the butyl chain extends to the left. The butyl chain has a carbonyl group (C=O) at the end, a methyl group on the second carbon, and an oxygen atom connecting it to the cyclohexane ring.
